

Full Stack Software Engineer with over 6 years experience building and evolving large-scale systems across monolithic and microservice architectures. Experienced in leading cross-functional initiatives, facilitating technical decision-making, mentoring engineers, and delivering projects with Agile at scale.

LANGUAGES, TOOLS AND TECHNOLOGIES

Languages	Frontend	Backend	Cloud & DevOps	Data/Metrics	Architecture	AI (non-commercial)
JavaScript/TypeScript	React	Node.js	GitHub Pipelines	Elastic	System design	Multi-Agent Orchestration
Agentic AI Tools	HTML/CSS	REST APIs	Docker	Kibana	Logging/Tooling	RAG
Java	WebView/iFrames	Microservices	AWS (various)	Grafana	Architecture Migration	Claude Code

Personal Learning - Agentic AI Tools and Workflows

- Built a series of code demos using AI Agent Teams and A2A communication to help develop my AI skills
- This includes bespoke config files at both global and project scale optimising token usage by up to ~25%
- Designed and implemented project-specific AI Agent Skills and bespoke Plugins

Sky - Full Stack Software Engineer

Consultant: July 2022 - April 2025 | Permanent: April 2025 - April 2026

- Worked on 6 separate repos/apps across the frontend, backend and data-munging layers. Min ~250k lines of code - Max ~1M
- TypeScript, JavaScript, Java, Octopus, Concourse, Percy UI testing, Akamai, CloudFlare
- Led a cross-team initiative across two squads to deliver the Experience Tracker in the My Sky App, driving improved CTR across ~1.5M weekly users and reducing Customer Service call costs.
- Contributed to feature-level system design for projects such as the new Smart Home and Sky Glass Bill's
- Worked closely with Product to make technical decisions that affected the tickets that went into the backlog
- Continually praised by Sky and had my contract renewed for 3yrs - recognised and awarded by Senior Leadership (15 internal awards total)
- Contributed code to migration from legacy monolithic architecture to microservices/micromonoliths across multiple product domains, improving deployment frequency and reducing average ticket cycle time by 50%.
- Certified practitioner of Scaled Agile Framework (SAFe)
- Contributed to multiple tools and apps used by ~1k staff and ~1.5M customers per week.

AND Digital - Product Developer (Consultant)

(Client: Sky) July 2022 - April 2025

- People Champion — drove employee satisfaction improvements through peer engagement and surveys, nominated for the Company People Forum
- Performed as a Career Coach, New Starter Buddy and Mentor with multiple colleagues seeing 3 colleagues through promotion and progression

OnePay - JavaScript Developer

November 2020 - July 2022

- Use JavaScript and NodeJS daily along with using AWS and some Salesforce in a strict microservice architecture
- Created a data munging/translation layer to communicate with with financial SOAP/XML APIs used across the digital estate
- Responsible for producing custom reports and data visualisation to analyse user base behaviour aid business leadership decisions

Wren Kitchens - Graduate/Junior Developer

August 2019 - November 2020

- Contributed to a multi-app 2D/3D browser-based CAD platform (TypeScript, JavaScript, SQL) working on apps of ~1M lines of code
- Developed and maintained a real-time 3D rendering feature from 2D plans, contributing to winning ReallT Project of the Year.
- Led implementation of mathematically complex rendering features, including parametric Bézier curve logic used in both technical construction plans and customer-facing visual outputs.

EDUCATION

Leeds Beckett University — Mathematics and Computer Science BSc (Hons) 2:1

Driffield School and Sixth Form, Driffield — A Levels: Maths (A), Physics (B), and Further Maths (D)
